

25. WILTON PLACE.
S.W.

April 10/73

My dear Gray

I sent off yesterday to Liverpool to be shipped by a Boston steamer a small box addressed to you containing our new part of Genera Plantarum which we have at last got from the printers. There was nothing from New to add as the progress of consolidation of the herbaria has been delayed of late by other matters which have taken up Oliver's time. In consequence also of Dr Torr's death I did not of course send the copy of Plantarum he had ordered. waiting for further directions from you, the 2^d part of vol XII (a new one) was to have been out but owing to a blunder of the lithographic

printer it will be still some days before
it is ready and I will send your copy
by post. You will kindly tell me
whether Columbia college takes the
copy of the new series I have ordered

I have ventured to read 10 copies
of the Genera. You say at least 12
I had you took 10 of Part III binds
& complete which makes 20 but I will
only charge you with them in your
account as I hear that you have
disposed of them. The publishing price
is 24/ if we sell them at less for
ready money with the ordinary discounts
that is at 20/- but as you take more
than a dozen for disposal we charge
you the trade price at 18/ in selling
them you will of course have to add
to the 20/ the expenses of printing etc.

I was very glad to hear you had
received the missing sheet &c. The
remainder of your copy was sent
by post last week.

I am now very busy at Flora
Antroatica about half the volume
is in the printers hands and another
quarter just ready for him. I then
hope to go to Brachion Museum

Yours ever sincerely
George Deuthaus
